

FINAL THOUGHT EXCHANGE REPORT

Austin Independent School District

Q1 What do you believe is currently going well for Austin ISD?

Willing to try non-traditional teaching models in magnet programs, and expanding those options for students across Austin. You've got to compete with charter schools but most importantly continue to innovate as we learn more about how best to educate all students.

LASA. You have a nationally ranked high school in LASA. LASA should be a source of pride and inspiration for the entire district. The district should support this campus with modern and improved facilities.

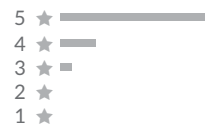

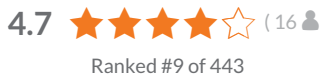

Public ed is imperative, the next few years are likely to be rough from a state policy perspective. The district/trustees are going to need to exercise a new lvl of strength an independence to deliver excellent local education.

Teachers Without good teachers, nothing is possible

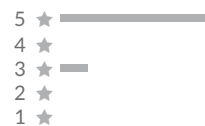

Inclusive, worldly approach to education
Students need to develop into kind and thoughtful global citizens

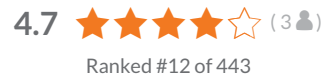

Leadership opportunities to grow teachers. It is important to correctly compensate and allow for teachers to grow into leaders, so we don't lose this talented group to admin jobs.

Definitely pay teachers more. They are struggling and will continue to leave.

AVID should be at all Elemnetary schools or even split up into to days so it is avaiable at all Elementary. AVID is like the seed planted into all these children lives to make it possible for student to even think they have a chance to be in a college.

Programs, events, zoom classes with information on what the district offers
Because as a parent I appreciate everything that is offered to my student so that they continue to advance in their success.

AISSD's recent equity bond is a wonderful example of putting the belief of equity into practice. Students, particularly those living in under-resourced communities, need to feel valued and have access to environments primed for learning.

A new superintendent He appears to have a real vision for the future of AISSD

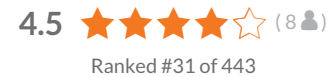

Passing the recent bond. Our aging facilities are driving families out of the district.

teachers kids need good teachers

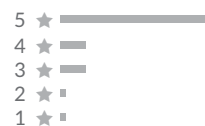

AISSD community is politically engaged and informed. It's important to not sugar coat the budget, standardized testing and teacher retention challenges caused by the politicians. So people can complain.

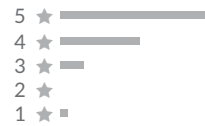

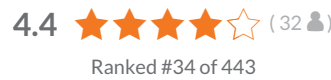

Lamar middle school should offer buses for all. Make it a magnet to get buses. Because kids who get in to fine arts who can't get a ride can't go, this is unfair and eliminates choices especially for low income kids.

I think the new superintendent who understands the district and its challenges is a good thing. We need a leader who won't desert us for the next rung on the ladder.

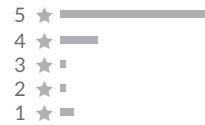

We are finally stabilizing when it comes to teacher retention. One reason is that the pay was slightly increased. We should show teachers their value by incentivizing things like teacher certification, ESL certification, GT certification, masters degrees, etc.

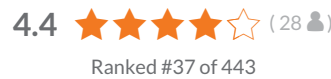

We currently have some fantastic magnet schools to which many of our high achieving students funnel. What are we doing for the students left behind? How can we better fund our low-SES campuses to create better pathways for learners who aren't able to attend a magnet?

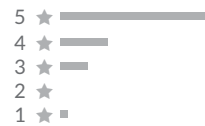

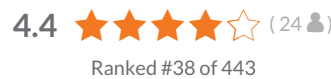

Pay raises for TAs was great. Now do it for teachers in a major way.

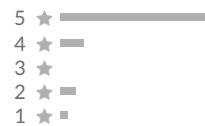

The variety of class options for middle and high school students. Presenting students with a variety of class options that are not part of their day to day lives opens doors for future possibilities w/ college / jobs

Love the new pool system for hiring. Our T1 school is (nearly) fully staffed! First time in 7 years. AISD made changes to help ensure we aren't left without teachers where the district has historically underserved students most. Glad for the effort.

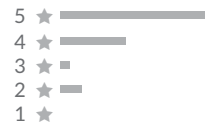

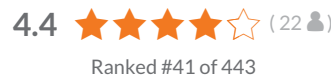

AISD provides access to full libraries at school, and encourages diversity in the student body. Promoting access to information, without unnecessary censorship, promotes curiosity and critical thinking.

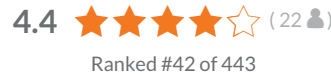

Amazing teachers Teachers are who impact the students on a daily basis. They are the ones doing the core work for the school district.

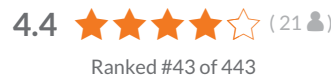

Sense of community Social-emotional learning is crucial, providing a strong base for other forms of growth (academic and beyond).

Teachers care A child learns better when there is a “true” interest from the teacher to help them succeed.

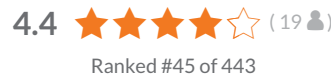

AISD students are able to earn high school credits in middle and college credits in high school. This helps families prepare for their future and make good financial decisions.

We have a new superintendent who seems to be invested in AISD, has knowledge of Austin and is an AISD parent AISD has been a next step to "bigger and better" school districts (and bigger and better salaries) for far too many superintendents.

Neighborhood schools Sense of community and connection

A commitment to steady, competent and invested leadership from the Superintendent, providing leadership and support for every student and employee. Steady leadership is key to stability across the district and to ensuring the best for students and teachers.

Hiring a superintendent who understands the district and is likely to stay. We need someone to stick around to lead us through this tough time in public education.

We are supportive of our school libraries and librarians. Libraries provide a place where all people can safely explore, create, connect and grow by providing equitable access to information and resources.

The Superintendent is fantastic. Hard work, transparency and integrity is a top down thing.

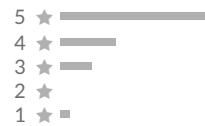

Caring and dedicated school personnel We put our trust in school personnel when we send you our kids everyday. It is critical that they create and foster a kind and supportive environment

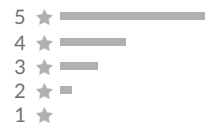

AISD celebrates diversity, and continues to have libraries and access to books for our students. All our students deserve to have the opportunity to read books where they see themselves, but also where they see and begin to understand others

Athletic opportunities and special education resources Students need athletics for holistic growth and special education resources for those that have special needs.

The new Enroll Austin system has the ability to prioritize access to programs for underserved kids! We want equitable access, but we keep providing access to kids based on adults' ability to secure lodging. We can use this tool to break that habit.

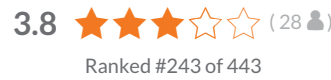

The supportive nature of admin within our schools. This needs to extend to district support and have better, more freely flowing communication. Culture is everything. I feel great at my school, but not supported by the district. We need consistency in policies and systems.

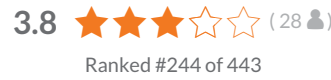

inclusion/pride, some neat offerings like chickens, gardening, jazz bands, etc, caring people still trying to make it better we lose the heart of students and miss the personal development of the child when we just focus on test scores

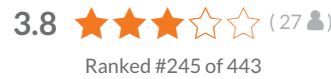

We have educators at the helm who claim to want equitable outcomes. But actions and policy change are required. Data shows no improvement yet. Equitable access and opportunities occur because we provide them. They don't just happen on their own. I hope changes are coming to policy.

graduation rates are fairly consistent across racial/ethnic groups, even though 3rd and 8th measures show large gaps? need to understand more clearly between 8th and 12th - are students catching up? are "grade level" measures off-track from graduation requirements?

Our current leadership in the Special Department. Their focus is on outcomes for students and ensuring that the staff working with these students is supported.

We love our Principal! We appreciate the options for middle and high school magnets. Local leadership fosters healthy community. More intensive, focused options for students who are ready helps set goals for post high school.

That they work well, not just from their chair, that they think about the needs of each school that they are fond of their work, the children depend on them. The most important thing is communication from ISD to parents, so that each parent connects with their students, so everyone will always be successful.

I cannot think of anything AISD is doing right.
AISD can see how they are failing our students.
Yet they continue the same trajectory. AISD
needs to stop and do a 180.

Testing The standardized testing is good and
important because it reflects the education
prowess of AISD.
