NEECHS (Reagan) - During the construction phase, an inspection of replaced electrical panels revealed the absence of panel ground wires. Third party commissioning agent ACR strongly recommended installation of panel ground wires due to safety concerns and also recommended possible replacement of existing conductors, also due to safety concerns. Project engineer indicated that replacement of existing conductors and addition of ground wires was intended as part of the design. However, replacement of conductors and addition of ground wires was not mentioned on the drawings or in the project specifications. Contractor claims cost of feeder replacement and addition of ground wires was not included in their bid.	\$200,000
Total August 2020	\$360,500

Contingency Transfers

Ann Richards - Increase in square footage to allow for new construction in line with district modernization principles instead of substantial renovation as planned, resulting in higher quality building, shorter schedule, and less disruption to the campus.

\$2,200,000

Murchison - Budget increased due to additional infrastructure required for future phases of modernization, including the connection between the existing building and new addition, drainage infrastructure, fire protection improvements, and additional temporary portables for onsite swing during construction.

\$2,500,000

Eastside Memorial HS - The cost of the delay, redesign, and historic materials salvage and reconstruction required a supplement to the budgeted from program contingency. The district coordinated with the Alumni Association to gain approval for demolition from the City of Austin Historic Landmark Commission. Historical preservation added a schedule delay in the project during design, resulting in a one school year delay to the project.

Doss - The dual language program required an increase in the space program from the typical Ed. Spec. to accommodate additional classrooms.

The final design relocated the building to the north east corner and increased it to three stories, utilizing the natural topography of the site. This resulted in saving significant green space and trees, but required demolishing and rebuilding the existing library, which had been planned to remain. The existing gym was able to be preserved due to its good condition, and location onsite.
