

## 2013-2014 AISD Student Climate Survey Mendez Middle School

Research indicates that school climate can either be a positive influence on students' learning environment, or can serve as a significant barrier to students' learning. Researchers have documented that positive ratings of student climate contribute to factors that help high economically disadvantaged schools "beat the odds" (Voight, Austin & Hanson, 2013). Indeed, students at high-performing AISD schools with high levels of economic disadvantage had more positive ratings of behavioral environment and adult fairness and respect in Spring 2013 than did students at lower performing AISD schools with similar levels of economic disadvantage (Lamb, 2014). The following tables show the total number of surveys students at Mendez completed in 2013-2014 (Table 1), the response rate by grade (Table 2), and the distribution of responses by race/ethnicity compared with the population (Table 3) for students at Mendez.

	Mendez	All Middle Schools
# of surveys returned	745	11,752
# of students	900	16,133
% of students represented	83%	73%

**Table 2. Response Rate by Grade for Mendez, 2013-2014**

grade	# of students enrolled	# of responses	response rate
6th grade	316	243	77%
7th grade	291	229	79%
8th grade	293	246	84%

Note. Population data reflect enrollment as of the PEIMS snapshot date in October 2013 whereas students' grade level and ethnicity were self-reported on the survey. The "ethnicity/race" designations allow students to first choose their ethnicity (Hispanic/Latino or non-Hispanic/Latino) and then choose one or more of five race values.

**Table 3. Distribution of Responses by Ethnicity/race for Mendez Relative to Mendez's School Population, 2013-2014**

Ethnicity	% of population	% of responses
Hispanic/Latino	91%	91%
<b>Race</b>		
American Indian/Alaskan Native	48%	8%
Asian	1%	2%
Black/African American	9%	11%
Native Hawaiian/Other Pacific Islander	1%	2%
White	44%	18%

Figure 1 depicts Mendez's average student climate survey ratings for 2013-2014, compared with average ratings across all Middle Schools in 2013-2014. Scores over 3.0 are desirable, as indicated by the green line. Please note the green and red text boxes that highlight the specific area in which Mendez most excels, as well as the area in which Mendez can improve most.

Figure 1. Student Climate Survey Subscales for Mendez and all Middle Schools, 2013-2014

Mendez's highest score on the 2013-2014 Student Climate Survey was for teacher expectations, which measures students' perceptions of their teachers' expectations. Please think about what your campus does to foster high expectations, and share your strategies with others.

Mendez's lowest score on the 2013-2014 Student Climate Survey was for behavioral environment, which measures the extent to which students respect each other, follow the rules, and feel safe at your campus. Higher ratings of behavioral environment have been associated with academic achievement. For resources on how to improve your campus' behavioral environment, please visit AISD's Social Emotional Learning (SEL) website: <http://www.austinisd.org/academics/sel> and the district's Respect for All website: <http://www.austinisd.org/respectforall>

The following pages contain more detailed information regarding Mendez's student climate results from 2011-2012 to 2013-2014. Please review the individual items on each subscale with particular attention to how Mendez's average ratings have changed or remained consistent over time. Please note that some subscales have changed from previous years, making longitudinal comparisons inappropriate for some items and subscales. For items and subscales where longitudinal data are available, statistically meaningful changes are noted with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning. Appendix B contains a table with the percentage of students responding favorably to each item.
